

Carolina Generators

About Us

Because of high customer demand, we added automatic emergency generators in 2006.

In 2018, Generac awarded **Carolina Generators Power Pro Premier Dealer Status** for consistently demonstrating superior sales and service.

Our service area includes all of the Upstate of South Carolina including Oconee, Pickens, Greenville, Spartanburg, Anderson, and Laurens counties.

"You're not just buying a service plan from us, you're buying a company."

"Since 1981, Carolina Heating Service has been committed to not just meeting its clients' expectations, but exceeding them."

"Above all else, we always do what's right for both our clients and employees. We accomplish this by adhering to our core values of honesty, integrity, courtesy, and quality."

- Scott Kelly President

Power to Protect

Like all equipment, your Generac standby generator will last longer and perform better with regular maintenance.

This not only ensures the highest level of performance, safety and reliability in your system – it also enhances your home's resale value by showing proof of maintenance to prospective buyers.

Generator Preventative Maintenance

GENERAC
Authorized Dealer

Do they have to be maintained?

Yes, simple maintenance is required. All generators require periodic oil and filter changes to ensure maximum performance for years of reliable service. Preventive maintenance kits are available and we offer annual maintenance contracts for a worry-free ownership experience.
